Database Systems: MySQL

Tools and Other Technologies: GitHub, Canva, Figma, DaVinci Resolve, CapCut

Coursework: Data Structures, Object-Oriented Programming, Web Development

PROJECTS

Vardaan – A community development platform built for Zilla Parishad Sangli.

[Live Link](#)

- Vardaan is a community development platform created with **Zilla Parishad Sangli** to promote inclusive growth in rural areas. As the frontend developer, I built a responsive interface using **React.js** and **Tailwind CSS**. The platform manages CSR initiatives in education, healthcare, livelihood, infrastructure, and sustainability, facilitating communication between stakeholders, local communities, and government bodies to empower rural society.

WebMonitor – A real-time website uptime and SSL monitoring application.

- WebMonitor is a web application built with **Spring Boot** and **React.js** that tracks the status, SSL details, domain information, and server details of multiple websites. It proactively monitors website uptime and alerts users via email when a site is down, or when SSL certificates or domain registrations are nearing expiration. This ensures timely action to maintain seamless website functionality and security.

ABM Audit Tool – A workflow platform for Chartered Accountants.

[Live Link](#)

- ABM Audit Tool is a software used by **Chartered Accountants** to ensure a proper flow of communication between auditors and clients regarding queries that arise during audit reports. It also helps CAs by providing the ability to create company audit reports and tax audit reports from start to finish. Built using **Laravel**, **MySQL**, and **Tailwind CSS**.

IBVL Bug Monitor – A bug tracking and communication system for internal IT teams.

- IBVL Bug Tracker is a bug management system developed for the IT team of **Imperative Business Ventures Ltd.** It helps track bugs found in different projects and facilitates communication between testers and developers, improving coordination and efficiency in the debugging process. Built using **Laravel**, **MySQL**, and **Tailwind CSS**.

Fitmeter – A fitness tracker and BMI calculator web app.

[Live Link](#)

- Fitmeter is a website where users can check their **Body Mass Index (BMI)**. It features automatic unit conversion — if a user inputs weight in kilograms but selects pounds, it will automatically convert, and vice versa. The same feature is available for height. Built using **HTML**, **CSS**, and **JavaScript**.

POSITIONS OF RESPONSIBILITY

Technical Executive – Google Developers Group (GDG)

Aug 2023 – May 2025

Walchand College of Engineering

Photographer & Graphic Designer – TEDx WCE

Mar 2025 – Apr 2025

Walchand College of Engineering

ACHIEVEMENTS

- Winner of Hackathon at CIMDR.
- Contributed to **Vardaan**, a project for a government body in Sangli.

NON-TECHNICAL SKILLS

Photography, Video Editing, Creativity, Multitasking, Critical Thinking, Hardworking
